

ENSE 405

Activity #4: An emerging picture

Name: Brandon Clarke, Brian(Jiwoun) Kim

Community (UN SD goal): 4.7, sub goal of #4 Quality Education. Ensure that all learners acquire the knowledge and skills needed to promote sustainable development.

Date: February 10, 2021

Instructions:

Using your researched information from activities 1-3, fill out the flowing comparing the current state of the art with what you think new (software) innovations could bring to the community

Covering the orientations	
Compare the left-hand column of the document "Technology configuration inventory" table with the right-hand column of the document "Community characteristics & orientation" table. What do you notice about the match (or mismatch) between your dominant community orientations and the current configuration of tools?	
How well does the technology inventory cover the orientations? What themes emerged from both the community orientations and the technology configuration from your colleagues' notes	The community needs a tool to organize and pick the outstanding or qualified video tutorials. Community members can discuss regarding what is qualified from the tutorials on YouTube. The orientations of the current system (YouTube comments, forums, etc.) are similar to that of what we hope to implement. The user has the same basic actions such as upload comment and like/upvote.
<input checked="" type="checkbox"/> Are you almost there? <input type="checkbox"/> Are there big gaps?	YouTube is successful to have a large amount of video tutorials however, it is quite difficult to find good or qualified resources for supporting education. What we hope to do is implement something that feels familiar in a new and more productive way.
What is the range of skills? If their interests and/or skills are diverse, could it cause conflict or distraction?	The range of skills in our users is very great. From those just starting their educational journey to those who are masters of their craft. In order to avoid chaos on our platform we will have to have very rigid organization between different topics and skill sets.
Achieving integration	
Look at all the pieces of your configuration	
What level of integration and interoperability has been achieved?	Some creators on YouTube offer playlists of their own or other videos to form a series on education.
Where are there big gaps	In the organization and community reinforcement of the quality of these videos and the order in which they are presented.
Balancing the polarities (Current state)
